Jiande Hunlee Electrical Appliance Co., Ltd
PROJECT NUMBER: SH-CERT210702489

Page 1 of 30
Issued: August 19, 2021
Revised: None

620 Old Peachtree Road NW, Suite 100, Suwanee, GA 30024 USA (770) 570-1800

Test Report Number: SHES210300467101

A representative sample of the product covered by this report has been evaluated and found to comply with the applicable requirements of:

UL 1363, Fifth Edition, June 12, 2018; CSA C22.2 No.308-18, Second Edition, April 2018

Issuing Laboratory	SGS-CSTC Standards Technical Services (Shanghai) Co., Ltd.
Address	No. 588 West Jindu Road, Songjiang District, Shanghai, China
Applicant	Jiande Hunlee Electrical Appliance Co., Ltd
Address	Chengnan Industrial Zone, Meicheng Town, Jiande City, Zhejiang Province, China.
Contact Details	Shenghua, Jin Phone:86-13758266818; Fax: 0571-58309907 Email: jsh@hlsocket.cn
Manufacturer	Jiande Hunlee Electrical Appliance Co., Ltd
Address	Chengnan Industrial Zone, Meicheng Town, Jiande City, Zhejiang Province, China.
Contact Details	Shenghua, Jin Phone:86-13758266818; Fax: 0571-58309907 Email: jsh@hlsocket.cn
Factory 1	Jiande Hunlee Electrical Appliance Co., Ltd
Address	Chengnan Industrial Zone, Meicheng Town, Jiande City, Zhejiang Province, China.

Product Type	Relocatable power tap
Trade Mark	
Product description	The products covered by this report are multiple socket-outlets, fitted with 14AWG power cord, with aluminum alloy enclosure, with overcurrent switch, with or without SPD, details see page 3 and 4.
Model Number(s)	See page 3 and 4
Model Differences	See page 3 and 4
Electrical Ratings	125V~ 15A, 60Hz, 1875W
Other Ratings	/
Accessories	N/A
Testing Laboratory	Suzhou Efficiency Testing Technology Co., Ltd. (witness testing)
Address	Building 5, Science and Technology City, No.78 Ke Ling Road, Suzhou Hi Tech Zone, Jiangsu, China
Date of receipt of test item	2021-03-15
Date(s) of performance of tests	2021-03-16 to 2021-04-09
Conditions of Acceptability	N/A

GENERAL INFORMATION

Components

Components used in the covered products must be those outlined in the latest edition of the Listing Report.

Listing Marking

This report along with a valid certificate authorizes the certificate holder to use the Listing Marking of SGS North America only on products covered by this report and in accordance with the Product Certification Program Policy Handbook.

Production Line Tests

Manufacturing and Production Tests shall be performed as required by this Report.

Responsibility of the Manufacturer and Factory

- 1) It is the manufacturer and factory's responsibility to restrict the use of markings which reference SGS to those products which are found by the manufacturers own inspection to comply with the product description in this report. This includes reference to SGS directly and/or indirectly.
- 2) During hours in which the factory is in operation, the SGS inspector shall be given unlimited access to any portion of the premises where the product and/or parts are being produced, assembled, inspected and labeled; and to the test area designated for routine tests. The SGS inspector shall be permitted to inspect and subject the products to prescribed tests prior to shipment any product bearing or intended to bear marking referencing SGS.
- 3) The factory shall provide all required testing equipment and facilities including trained personnel for conducting all routine tests that are to be performed at the factory. These shall be available when needed so that the inspection work can proceed without delays.

This document is issued by the Company subject to its General Conditions of Service printed overleaf, available on request or accessible at www.sgs.com/terms_and_conditions.htm and, for electronic format documents, subject to Terms and Conditions for Electronic Documents at www.sgs.com/terms_e-document.htm. Attention is drawn to the limitation of liability, indemnification and jurisdiction issues defined therein. Any holder of this document is advised that information contained hereon reflects the Company's findings at the time of its intervention only and within the limits of Client's instructions, if any. The Company's sole responsibility is to its Client and this document does not exonerate parties to a transaction from exercising all their rights and obligations under the transaction documents. This document cannot be reproduced except in full, without prior written approval of the Company. Any unauthorized alteration, forgery or falsification of the content or appearance of this document is unlawful and offenders may be prosecuted to the fullest extent of the law. Unless otherwise stated the results shown in this test report refer only to the sample(s) tested and such sample(s) are retained for 90 days only.

Follow up Inspections

As part of the SGS Follow-Up inspection, it is required that an inspector periodically visit the factory location(s) and select for examination and/or testing, the most recent production sample of the product covered in the Listing Report.

SGS Inspector

- 1) A product which is found by the SGS inspector to have features which make it unacceptable to bear marking referencing SGS shall be corrected if the listing marking is to be used. The inspector shall carefully check additional production for such features until conditions are considered normal.
- 2) A product which does not comply with the provisions of the listing report shall have all reference to SGS removed. If the rejection of the product is questioned by the factory representative, it may be put on hold in separate area of location pending appeal. The factory shall satisfy the inspector that all marks referencing SGS are removed from the rejected material or finished product. Factory shall destroy product and or turn over to inspector for destruction.
- 3) All discrepancies between the product and the listing report shall be immediately stated to the attention of the factory representative. This shall be noted in the follow-up inspection report as a discrepancy.

This document is issued by the Company subject to its General Conditions of Service printed overleaf, available on request or accessible at www.sgs.com/terms_and_conditions.htm and, for electronic format documents, subject to Terms and Conditions for Electronic Documents at www.sgs.com/terms_e-document.htm. Attention is drawn to the limitation of liability, indemnification and jurisdiction issues defined therein. Any holder of this document is advised that information contained hereon reflects the Company's findings at the time of its intervention only and within the limits of Client's instructions, if any. The Company's sole responsibility is to its Client and this document does not exonerate parties to a transaction from exercising all their rights and obligations under the transaction documents. This document cannot be reproduced except in full, without prior written approval of the Company. Any unauthorized alteration, forgery or falsification of the content or appearance of this document is unlawful and offenders may be prosecuted to the fullest extent of the law. Unless otherwise stated the results shown in this test report refer only to the sample(s) tested and such sample(s) are retained for 90 days only.

GENERAL CONSTRUCTIONAL REQUIREMENTS TO BE VERIFIED

Construction Details - This section specifies construction and component details in addition to the critical components table which are to be verified during factory follow-up inspections.

CORROSION PROTECTION:

All metal parts are suitably protected against corrosion by painting, plating or the equivalent.

SHARPNESS OF EDGES:

All edges and corners of the frame, enclosure, guards, etc. exposed during normal use or maintenance or which may be contacted by internal wiring are smooth and well-rounded.

COMPONENTS MOUNTING:

All components are securely mounted and prevented from rotation by a means other than friction. For example, components may be mounted by two screws or a single screw and locator pin. Stem mounted components may be mounted in keyed openings, openings with flat sides or provided with a lock washer on the stem between the component body and its mounting surface.

This document is issued by the Company subject to its General Conditions of Service printed overleaf, available on request or accessible at www.sgs.com/terms_and_conditions.htm and, for electronic format documents, subject to Terms and Conditions for Electronic Documents at www.sgs.com/terms_e-document.htm. Attention is drawn to the limitation of liability, indemnification and jurisdiction issues defined therein. Any holder of this document is advised that information contained hereon reflects the Company's findings at the time of its intervention only and within the limits of Client's instructions, if any. ROUTINE TESTS FOR MANUFACTURING AND PRODUCTION

The manufacturer shall perform the following Manufacturing and Production Tests on 100% of equipment produced which has both hazardous live parts and accessible conductive parts

Required Tests

Grounding Continuity Test

Continuity between the grounding connection (the grounding pin of the attachment plug, the grounding terminal or lead), and accessible dead-metal parts of the device, the grounding pin of a receptacle, if provided, as well as dead-metal parts within the enclosure which are exposed to contact during user servicing and are likely to become energized, were checked a 40A current derived from a 60 Hz source with a no load voltage not exceeding 6 V passed between the grounding connection and accessible dead-metal parts of the device. The voltage drop between the two points of connection was then measured

The test results obtained indicated good ground continuity. For all locations, the resistance measurements were less than 0.1 ohms.

Dielectric Voltage Withstand Test

As a routine production line test, the samples shall be subjected to a 1250V voltage applied for one minute between live parts of opposite polarity, between live parts and grounding or dead metal parts and between live parts and the enclosure.

The results are acceptable if there is no dielectric breakdown.

<u>Test Point</u>	<u>Test Voltage</u>	<u>Test Time</u>
Between live parts of opposite polarity	1250 Vac or 1768 Vdc	1 minute
Between live parts and grounding or dead metal parts.	1250 Vac or 1768 Vdc	1 minute

SUMMARY OF TEST RESULTS

A representative sample of the product covered by this report has been evaluated and found to comply with the applicable requirements of the standard for: Safety of Relocatable Power Taps, UL 1363, Fifth Edition, June 12, 2018; CSA C22.2 No.308-18, Second Edition, April 2018	
30 (8.6)	Temperature test
31 (8.3)	Dielectric Voltage-Withstand Test
32 (8.7)	Leakage Current Test
33	Grounding Continuity Test
36	Mounting Hole Barrier Tests
37 (8.29)	Strain Relief Test
38 (8.2)	Impact Tests
39	Crushing Test
40 (8.28)	Adequacy of Mounting Test
43 (8.15)	Mold Stress-Relief Distortion Test

The following tests were performed:

Results of the tests indicate the specimens conform to the test criteria that were found to be applicable.
