TRANSFER BENCH FOR TUB INSTRUCTION MANUAL

LB-BME-799G3

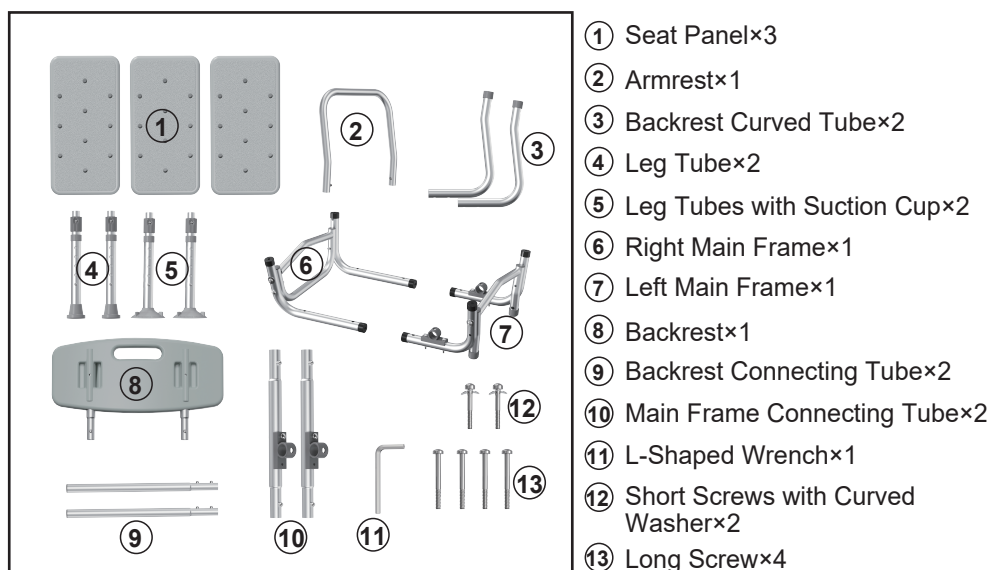

Note: Please read and understand all contents of this manual before using this product.

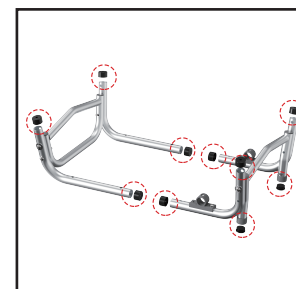

ABOUT PRODUCT

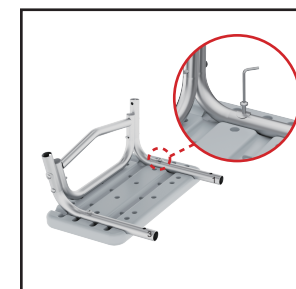

PACKING LIST

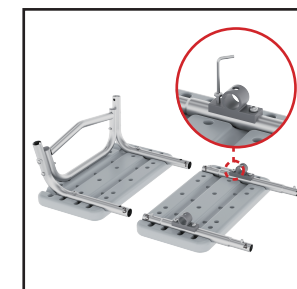

ASSEMBLY

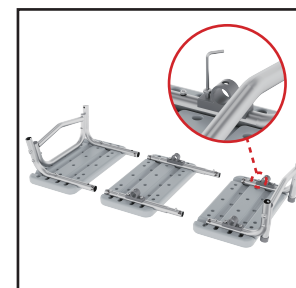

STEP 1 PREPARE FRAMES:
Remove the black protective caps from the pipe openings of the Left and Right Main Frames (6 & 7). Place the frames upside down on a flat, clean surface.

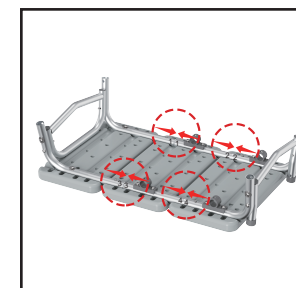

STEP 2 ATTACH LEFT PANEL:
Place one Seat Panel (1) into the grooves on the underside of the Left Main Frame (7). Align the screw holes. Use the L-Shaped Wrench (11) to secure it with the two Short Bolts and Curved Washers (12).

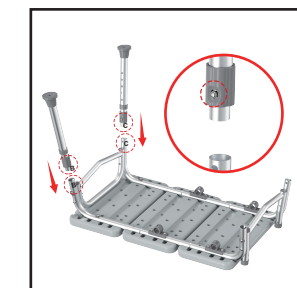

STEP 3 ATTACH CONNECTORS:
Place the two Middle Seat Connector Tubes (10) into the grooves on the underside of the center Seat Panel (1). Align the screw holes and use the L-Shaped Wrench (11) to secure them with two Long Bolts (13).

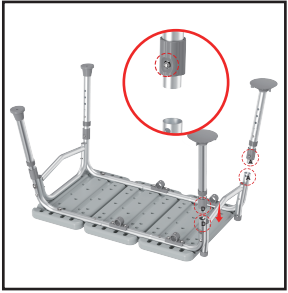

STEP 4 ATTACH RIGHT PANEL:
Place the final Seat Panel (1) into the grooves on the underside of the Right Main Frame (6). Align the screw holes and use the L-Shaped Wrench (11) to secure it with the remaining two Long Bolts (13).

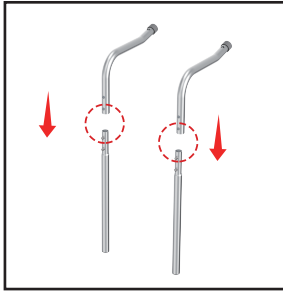

STEP 5 ASSEMBLE SEAT SECTIONS:
Connect the three assembled seat panel components together using the corresponding number labels. (NOTE: Ensure all Spring Pins (Push Buttons) fully pop out of the holes to lock the sections securely.)

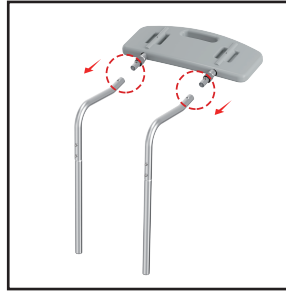

STEP 6 INSTALL LEFT LEGS:
Insert the Standard Leg Tubes (4) into the bottom of the Left Main Frame, matching the corresponding letter labels. (For now, just insert; do not adjust height yet.)

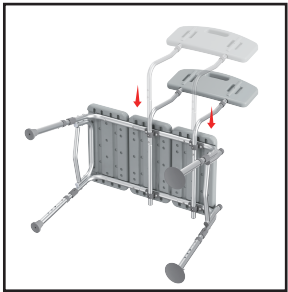

STEP 7 INSTALL RIGHT LEGS: Repeat the process to attach the Suction Cup Leg Tubes (5) to the bottom of the Right Main Frame, matching the corresponding letter labels.

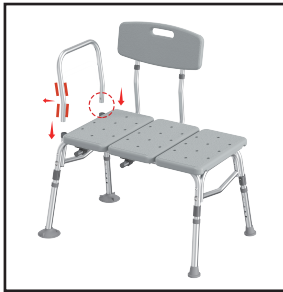

STEP 8 ASSEMBLE BACKREST POSTS: Insert the two Backrest Curved Tubes (3) into the two Backrest Connecting Tubes (9). (NOTE: Ensure the Spring Pins on both sides fully pop out of the holes to lock them.)

STEP 9 ATTACH BACKREST PANEL: Attach the opposite ends of the Backrest Curved Tubes to the Backrest Panel (8). (NOTE: Ensure the Spring Pins fully pop out of the holes to lock the panel.)

STEP 10 ATTACH BACKREST UNIT: Rotate the assembled main frame 90° (Right-side up). Attach the assembled Backrest Unit to the bottom of the main frame. (NOTE: Adjust the backrest's distance by locking either one or two spring pins into the frame holes as preferred.)

STEP 11 ATTACH ARMREST: Attach the Armrest (2) to the sides of the main frame. Ensure the curved side of the armrest faces outward and the Spring Pins fully pop out of the holes to lock it.

STEP 12 FINAL HEIGHT ADJUSTMENT & SAFETY CHECK: Press the pins and adjust the height of all four legs to your body size. (CRITICAL CHECK: Ensure all four legs are set to the exact same height and the Spring Pins are fully protruded and locked in the adjustment holes before use.)

I. IMPORTANT SAFETY WARNINGS

FAILURE TO READ AND UNDERSTAND ALL INSTRUCTIONS MAY LEAD TO PRODUCT DAMAGE OR PERSONAL INJURY.

1. Read Completely: You must read and fully understand this user manual before assembling or using the product.
2. Pre-Use Stability Check: Before each use, ensure the product is correctly assembled and adjusted. Check that all connections are secure and the bench does not wobble.
3. Locking Confirmation (CRITICAL): When adjusting the leg height, you must confirm that the Spring Pins (Push Buttons) have fully popped out and securely engaged in the adjustment holes.
4. Floor Surface: The product must only be used on a flat and level surface.
5. Part Inspection: Immediately STOP USE if any part of the product is damaged, worn, or loose.
6. Maintenance: If the foot pads or suction cups are worn out or ineffective, replace them immediately.
7. Cleaning: Do not use strong corrosive or abrasive cleaners on the product surface.
